

# Accessing the PBS Embargo Data API (Public Beta)

## FOR YOUR ACTION

Access to the PBS Embargo Data API can be applied for through the Health Products Portal (HPP) at <https://business.health.gov.au/>. This document provides details on the steps involved and training webinars.

## REGISTERING IN THE HPP

Please note these steps are one-off registration activities

### Step 1 – Set up your myGovID

Access to the HPP requires a [myGovID](#). Please set-up a myGovID if you do not already have one. Please note, this is different to myGov. A myGovID is an Australian Government Digital Identity authentication method you can use to sign into a range of participating government online services like the HPP.

### Step 2 – Link your myGovID to your organisation in Relationship Authorisation Manager (RAM)

Once you have created a myGovID profile, it will need to be linked to your organisation in [Relationship Authorisation Manager \(RAM\)](#). For more assistance on this, please see the Support Article [Registering in the HPP](#).

To ensure the details you are providing to your RAM Administrator are correct, open your myGovID app on your phone and complete the table below. The information required can be found by opening the 'My identity' page in the myGovID app (Figure 1). Once completed, send the below table to your organisation's RAM Administrator to be linked to your organisation.

**Note: It is important that all fields match what is in the 'My Identity' page. Do not provide a middle name if it is not in your myGovID profile.**

| Details:  | Please complete:            |
|---|-----------------------------|
| <b>First Name</b><br>(Must match myGovID First Name)  | <First name>                |
| <b>Middle Name</b><br>(Must match myGovID Middle Name, if applicable. Do not provide a middle name if it is not included in your myGovID) | <Middle name if applicable> |
| <b>Last Name</b><br>(Must match myGovID Last Name)  | <Last name>                 |
| <b>myGovID Email</b><br>(Must match myGovID app)  | <email>                     |
| <b>Preferred work email</b><br>(this does not need to match myGovID email address)  | <email>                     |

### Step 3 – Finalise Authentication

You will receive an email from RAM with an authorisation code which **expires in 7 days**. Follow the prompts in this email to finalise your whole of Government Authentication. If your code expires, please let your RAM Administrator know so they can generate a new authorisation code (step 3).

### Step 4 – Sign in and create a profile in the HPP

You can now access the HPP by selecting the 'Continue with Digital Identity' button on <https://business.health.gov.au/>. This will establish your personal profile in the HPP. You may update any personal details in your HPP profile, this will not impact your myGovID. Please note you will need to sign into the HPP before you can be linked to an organisation.

### Step 5 – Gaining access to your organisation within the HPP

If you are the first member of your organisation to register within the HPP, you will need to register your organisation from the 'Personalise your session' page. If your organisation has already been registered, you can request access to your organisation from the 'Personalise your session page'. For more assistance on member management within the HPP, please see the Support Article [Managing Members](#).

Once you have access to your organisation within the HPP, you will be able to lodge your Request to access the PBS Embargo Data API. For more assistance on this, please see the Support Article [Accessing PBS Embargo data via the API](#)

Please contact HPP Support [HPP.Support@Health.gov.au](mailto:HPP.Support@Health.gov.au) if you have any questions. Further information on the HPP can be found on the HPP website at <https://hpp.health.gov.au/>.
